

Student Health Information Forms

The School Health team requests the *Student Health Information* forms be completed each year. They are school specific. The forms are a very important part of the School Health Program. They give us up-to-date information on your student-new medications, allergies, etc.

Additionally, the *Student Health Information* forms are a part of the District's Emergency Operations Plan. In the event of an emergency-loss of internet or a power outage, the Student Health Team will have enough health information to safely care for your student if electronic records cannot be accessed. In the event of an emergency that requires evacuation of a school campus, the *Student Health Information* forms are portable-they are easily transported along with other emergency equipment by the Health Aide at your student's school. Besides health information, they also provide emergency contact information.
